

**MODELS : B 3000 (H), B 3000 (O)****B-3000 (H)**

Machine designed with a hydraulic power pack and control circuit effortless loading, unloading operation.

A dial gauge in front measure depth of ball penetration. This facilities production testing within tolerance limits by compression method.

B-3000 (O)

Basic machine design & operation similar to B-3000 (H). In addition 'optical device' with 14 x magnification provided in front to project dia of ball impression on glass screen with a micrometer measuring system with 0.01mm accuracy. The indenter swivels & projects dia of ball impression immediately after unloading operation which avoids additional time for measurement of ball impression.

MODELS : B 3000 (H), B 3000 (O)

SAROJ Hardness Testers, Model B-3000 (H) & Model 3000 (O) are precision engineered confirming to IS:2281-1968, BS:240 and ASTM:E 10, however B-3000 (H) & Model 3000 (O) are most suitable for production testing. These machines are designed to measure hardness of castings, forgings, other metals and alloys of all kinds, hard or soft, whether flat, round or irregular in shape.
